Minor changes included

From production marathon to controlled flow.

Spend less time filming and more time communicating. AI Avatar production keeps creative judgement and human review, while reducing production overhead, scheduling pressure and repeated on-camera takes.

BEFORE · TRADITIONAL PRODUCTION

Studio booking, crew, lighting and sound, wardrobe and setup.
Rehearsal, memorising or teleprompter practice.
Camera pressure and multiple takes - the familiar on-camera NG moments.
Editing, captions, factual checks, approval, publishing and costly late corrections.

Time cost: every meaningful change can mean another round of filming.

NOW · AI AVATAR PRODUCTION

Approve the script, tone and brand once.
A basic AI-assisted grammar and clarity pass flags obvious issues before generation.
No studio, crew, rehearsal or physical reshoot required.
Keep delivery, background and captions consistent.
Finish with human QA for names, dates, subtitles and brand before publish.

Result: no physical reshoot or on-camera NG - one controlled production flow. Technical AI renders may still be used when needed.

DISCUSS A DURATION

What we need from you

A complete, approved brief keeps production fast and prevents avoidable regeneration costs.

- 01

Final approved script
Correct names, titles, dates and pronunciation notes.
- 02

Audience and tone
Who will watch, and whether delivery should be formal, warm or energetic.
- 03

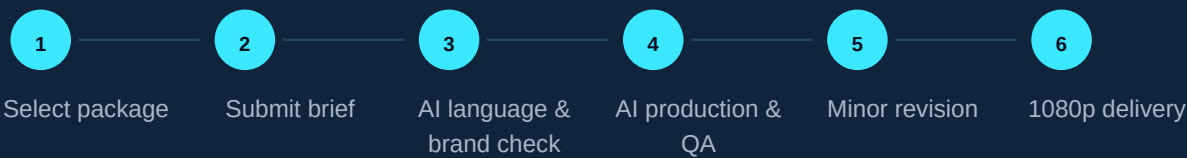

Brand assets
Logo, brand colours, preferred background and mandatory visual elements.
- 04

Avatar, voice and format
Language, voice, framing and 16:9, 9:16 or 1:1 output.
- 05

Rights and consent
You must own supplied assets and provide written consent for custom likeness or voice.
- 06

Deadline and feedback
Confirm delivery timing and consolidate revision notes in one clear list.

Production flow

Important: Unauthorized likeness or voice cloning is not accepted. Major script or visual changes after generation are treated as a new regeneration and quoted separately.
